"The Start-Up Star competition showcases how entities can work together to drive a strong economy and create jobs. The County's workforce development initiative stresses the importance of working together with business leaders, hiring managers and educators to develop our local workforce and help Burlington County residents find jobs. This contest expands that concept to the next generation. Entrepreneurs have the power to create job opportunities. We want to encourage young people, as well as veterans, to stay in Burlington County where we have many great resources that can help them successfully build their business."
